HB 2

My name is Roxy Arnett. I am a traumatic brain injury survivor who lives in Great Falls. I fell at the age of 12. It was hard growing up with a brain injury ,but as an adult I live independently. Throughout my life working and living independently has been challenging, but I am really trying! I really enjoy the support of the brain injury support group. If I did not have the support of the brain injury group I don't know where I'd be. I want other traumatic brain injury survivors to have the same support I do .Please support RFS.

I also get home care from Easter Seals. I like my home care worker and wish more people could get help like I did. We need good workers who do not panic when we try to learn new skills.

Thank you for reading my letter.
